Subject: Microsoft Settlement

The proposed settlement will not accomplished any valid correction or even punishment of Microsoft.

The proposed contirbution of software product to schools is a benefit.... it further's MS's Monopoly power by getting an early commitment from children to their operating system.

Please accept the RedHat proposal to distribute their software for free and instead require MS to contribute hardware not software.

The rest of the settlement is such a disgusting sellout by the DOJ to Microsoft its hard for me to even comment on it. Please demand more of Microsoft.

Thanks
